

Demo Sale

You can save hundreds, even thousands, of dollars **this month only** at our Demo Sale. We need to make room for new equipment, so we're selling our current demonstration pieces and discontinued models. I've even marked down some new equipment, simply because I ordered too much.

These are new, never registered units. Some have low hours from sales demonstrations and are still under warranty, and some are brand new. We have three-point implements, skid steer attachments and even a few mowers and tractors. Our supply is very limited so don't wait.

Financing is available on some of these sale items. You'll need to call or stop by to learn more about these great deals.

Tim Cockerham,
Manager

Puts You In Control

With the LB75.B loader backhoe from New Holland, it's all about control. This machine has several industry-leading features, including the exclusive pilot controls. It's an electro over hydraulic system that lets you change between loader backhoe and hydraulic excavator patterns without getting out of the seat. It's simply the flip of a switch. This quick-change system lets you transition between jobs without losing valuable time and energy.

Pilot controls also let you adjust the control pedestals and wrist rests to accommodate operators of any size. No matter who's in the cab, the loader backhoe fits them just right. That means easier operation, more comfort and less fatigue for the operator.

You'll increase productivity even if the pilot controls were the only feature worth talking about. But, the New Holland loader backhoe also leads the industry in horsepower (it has a 4.5 liter engine), loader lift (nearly a ton more than the competition) and backhoe lift (greater capacity and a larger swing arc). All that power, coupled with a wide wheelbase and the highest ground clearance, gives you a stable seat on

the job and keeps you working no matter how rough the terrain.

It seems hard to improve upon the New Holland LB75.B loader backhoe. But when you buy from Charlotte Tractor, you're eligible for the Customer Care Commitment program. As always, you'll get expert advice, parts and service; but for your loader backhoe you'll also get a free loaner should yours be down, free service for the first year and guaranteed parts availability.* You can also ask about our three-year bucket-to-bucket warranty.

Come into Charlotte Tractor, try out the LB75.B and take control.

*(Some restrictions apply. See dealer for details.)

New Holland Boomer TZ

Sometimes the little guy doesn't know he's little. The New Holland TZ sub-compact is definitely one of those cases. Not much bigger than your average riding lawn mower, the commercial grade TZ18DA and TZ24DA have big tractor features.

With two power-take-offs and optional attachments, you can customize your Boomer TZ to handle practically any job from mowing and tilling to loader work and bush hogging. New Holland

makes it easy to move from job to job with the Quick-Latch system, which allows you to switch attachments in just minutes – without tools – and get back to work.

The Boomer TZ is available with an 18HP or 24HP diesel engine. It has four-wheel drive and a hydrostatic transmission. To find out more about this great big, little tractor, stop by or call Charlotte Tractor for a demo.

BOOMER

Your Ace In The Hole

In a city where you can play golf nine months out of the year, it's important to have the right equipment to stay the course. When you pair up the Kubota RTV900 utility vehicle and the Kubota ZG20-48 or ZG23-54 zero-turn radius mower, you've got an ace in the hole for turf care, whether you're tending an 18-hole course or your own backyard.

The RTV has a 1/2-ton dumping cargo bed to haul everything from sod and fertilizer to chainsaws and tree trimmings. The ZG zero-turn mower makes short work of long fairways and quickly maneuvers around curvy flower beds.

The RTV and ZG combine Kubota quality with innovative design and the latest technology to give you great-looking machines that are reliable and durable. Kubota products plus parts, service and support from Charlotte Tractor will keep you swinging on and off the course.

Kubota ZG zero-turn mower

- 20HP or 23HP gas engine
- 48" or 54" deck
- Hydraulic deck lift
- Sealed transmission

Kubota

Kubota RTV900 utility vehicle

- First in class to offer hydrostatic power steering and hydrostatic transmission
- 22HP diesel engine
- 4 wheel drive
- Turf-sensitive or aggressive off-road tires
- Camo also available
